RESPONSE

In response to the action mailed August 6, 2002, please amend the application as follows:

In the claims:

Please amend claims 1 to 9 as follows:

-- 1. A method for mutagenesis comprising:

annealing one or more primers having a nucleotide sequence containing at least one mutation and a phosphorylated 5'-terminus, to a DNA template;

elongating the annealed primer or primers by using a DNA polymerase;

ligating the phosphorylated 5'-terminus and the elongated terminus of the primer or primers by means of a DNA ligase to synthesize a circular DNA containing said primer or primers;

denaturing the circular DNA;

repeating the reactions of annealing, elongating, litgating, and denaturing to amplify the circular DNA to generate DNA products including a multiple copies of a single-stranded circular DNA containing the primer or primers;
